

2017-2021

**Legal Services
Advertising in the
United States**

INTRO

Introduction & Background

Trial lawyers and aggregators increasingly spend large sums of money on advertising to recruit new clients for class action lawsuits. In 2021, it is estimated that more than \$971.6 million were spent on more than 15.1 million television ads for local legal services or soliciting legal claims across the United States. When compared with the same time period in 2020, spending on these ads increased more than 11% while the quantity of ads increased more than 9%. Much of this advertising is conducted by aggregators: businesses that recruit potential plaintiffs and then sell their information to law firms.

Consumers see doomsday ads about the lethal effects of medications or even general medical injury and can consequently stop use of medicines prescribed by their health care providers. This is often done without consulting their doctor, resulting in health problems for patients and increasing litigation risk for product manufacturers.

These over-the-top advertisements from personal injury attorneys with catchy jingles and toll-free numbers pose a serious danger. These ads undermine the simple notion that physicians and health care providers – not personal injury lawyers or the “aggregators” who run the ads for the lawyer – should dispense medical advice.

Trial lawyers continue to pump significant money into these ad buys because, armed with more clients, they can boost settlements and payouts when they go after large corporations. This ultimately leads to larger contingency fees for the lawyers themselves.

The ads do more than help recruit clients, however. They can also influence the thinking of citizens who may serve on a jury in lawsuits. A survey conducted by Trial Partners, Inc. found that 90% of jurors would be somewhat or very concerned if they saw an advertisement claiming a company's product injured people. Additionally, 72% of jurors agreed somewhat or strongly that if there are lawsuits against a company claiming its products injured people, then there is probably truth to the claim – showing just how great an impact these ads can have.

National Data & Analysis

Between 2017 and 2021, \$6.8 billion was spent on more than 77 million national and local ads.

In 2021, more than 15 million ads for legal services aired on local television broadcast networks in the 210 media markets across the U.S., totaling approximately \$971.6 million spent. By comparison, pizza restaurants spent \$67.4 million on a mere 845,000 ads while furniture retailers spent \$589 million on 4.8 million ads aired on local television broadcast networks.

Additionally, trial lawyer groups aired more than 71,000 ads on national cable television at an estimated cost of \$97 million in 2021.

The number of ads aired by trial lawyer groups across local and cable television, radio, and outdoor billboards has increased more than 30% since 2017.

State Data & Analysis

Local TV

On average, spending on local legal services television ads increased nationwide by nearly 10% between 2017 and 2021. Spending in most states increased, with only nine states showing overall decreases over the five-year span. Florida, Texas, California, New York and Georgia spent the most by dollar amount over the five-year span. In terms of average yearly percentage increases, Wyoming, Montana, South Dakota, Alaska and New Mexico saw the largest percentage increases in spending on local legal services ads between 2017 and 2021.

The quantity of ads airing also increased by an average of nearly 12%. Again, the majority of states saw increases in ads, with only seven states seeing a decrease in local legal services ads airing on television. Over the five-year span, viewers in Florida, Texas, Alabama, Georgia and Louisiana saw the most local legal services ads on television. In terms of average yearly percentage increases, Wyoming, South Dakota, Alaska, New Mexico and Montana saw the largest percentage increases in the quantity of ads aired between 2017 and 2021.

Conclusion

Trial lawyers across the United States identify jurisdictions friendly to their work and relentlessly pursue new clients in search of the next large payout from a trial or settlement.

The Federal Trade Commission sent letters to various law firms and others, flagging their ads soliciting clients for personal injury lawsuits against drug manufacturers as potentially “unlawful” in September 2019.

A Public Opinion Strategies survey found that 72% of Americans saw ads by law firms about pharmaceutical lawsuits in 2016. Further, the survey states that one-in-four people who saw one of these ads concerning a medicine they take, say they would immediately stop taking the medicine without consulting their doctor.

Such ads have been associated directly with patients’ deaths. A 2019 FDA study shows the real-life consequences of these ads. The report found 66 reports of adverse events following patients discontinuing their blood thinner medication (Pradaxa, Xarelto, Eliquis or Savaysa) after viewing a lawyer advertisement. The median patient age was 70 and 98% stopped medication use without consulting with their doctor. Thirty-three patients experienced a stroke, 24 experienced another serious injury, and seven people died. Dr. Ilana Kutinsky who has testified before Congress on the issue and was doctor for one of the deceased, stated: “Patients are dying because they are afraid to take the medications prescribed for them due to the fear brought on by these negative and one-sided campaigns.”

While there are not enough bandages to cover the injuries trial lawyer advertising has caused, we can take steps to inform the general public. Through education we can shine a spotlight on the aggregators who mislead consumers and sell their information to law firms. By arming everyday Americans with this knowledge, we can help push back against trial lawyers and engage with our local leaders for potential solutions and policy changes.

Methodology

Analysis conducted by the American Tort Reform Association utilizing data provided by Kantar.

State and city TV advertising data cited in this report does not include legal services TV advertisements broadcast nationally on national cable and broadcast networks or during nationally syndicated programming nor does it include local cable television broadcasts.

Ad spending figures are estimates based on publicly-available ad rate information and industry surveys. Data are estimates and may vary over time due to revisions to account for duplicates or errors and the availability of updated ad rate information.

National TV advertising includes: Cable TV - ads airing nationally on any of the monitored cable networks (e.g. USA, AMC, CNN); Network TV - ads airing nationally on any of the national broadcast networks (e.g. ABC, CBS, FOX, NBC); Spanish Lang Network - ads airing nationally on any of the Spanish-language national broadcast networks (e.g. Telemundo, Univision); and Syndication - ads airing nationally on syndicated programs wherever they are broadcast across the country. Local broadcast TV advertising or “Spot TV” includes ads airing on local broadcast networks (e.g. A TV ad that airs on WJLA during the 5PM evening news is seen only by viewers in the Washington, DC media market or designated market area (DMA)).

Data on Outdoor Advertising Service is provided by Kantar and reports billboard expenditures (poster and paint) in over 200 plant operator markets in the United States. Outdoor data collection reports include 8 sheets, 30 sheets, bulletins, painted walls, transit/bus shelters, in-store displays, convenience stores, shopping malls, airport, taxi displays and truck/mobile advertising. Brand expenditure data are provided by participating plant operators. The market-by-market dollar figures are not projected and represent actual gross sales volume for participating plant operators only. Markets are defined according to Standard Metropolitan Statistical Areas (SMSAs). Outdoor data are mapped to monitored TV markets where applicable, and to the All Other designation when appearing outside these markets.

STATION NOTES

Station-level occurrence detail for local radio advertising, provided to Kantar by Media Monitors. Media Monitors's local radio monitoring uses proprietary, patent-protected audio pattern matching technology to detect and identify radio advertisements. The software algorithm processes radio station recordings, detects known patterns and repeating unknown patterns. Known ads are automatically added to the database, while new ads discovered are then reviewed for classification. All Local Radio reporting will include detections that are 10 seconds or longer. Live spots are not monitored.
